

Mark Dowlan — Technology Specialist and Trainee Patent Attorney

Bachelor of Engineering (Computing)

Mark has over 18 years experience working with clients in the management, design and implementation of technical solutions.

Prior to joining Murray Trento & Associates Pty Ltd (MTA), Mark worked for Accenture designing and developing solutions for a variety of small and large, public and private sector clients.

Mark holds a Bachelor of Engineering (Computing) with first class honours from Monash University. As an engineer he has been trained in a diverse range of skills from manufacturing and quality systems to business processes, supply chain and facility layouts.

With his engineering background Mark brings a methodical and pragmatic approach to any engagement. Subsequent to his graduation from University, Mark worked for Accenture (a global management consulting, technology services and outsourcing company) from 1997 through to 2010.

During this time Mark worked across a range of industries, clients and technologies and his many roles included solution architecture, system development, project management, data modelling, software requirements development and system reviews.

Mark worked extensively with both custom and packaged technology solutions for a variety of small and large, public and private clients.

Since joining MTA, Mark has assisted in the development of patent applications in the following fields:

- Database systems and searching algorithms.
- Consumables and wearable technologies.
- Mobile applications and supporting infrastructure.
- Social media applications.
- Financial transactions and processing systems and
- Interfacing technologies.
